

HAMZA ANSARI

B.Tech CSE (AI/ML) Student | Aspiring Software Developer

Nashik, Maharashtra | myprojects7020@gmail.com | [GitHub: hamxaansari21-svg](https://github.com/hamxaansari21-svg)

PROFESSIONAL SUMMARY

Second-year B.Tech Computer Science and Engineering student specializing in Artificial Intelligence and Machine Learning at Sandip University, Nashik. Interested in Python programming, web development, and computer-vision applications. Building hands-on academic projects while strengthening programming fundamentals and software development skills.

EDUCATION

B.Tech — Computer Science and Engineering (AI/ML)

Sandip University, Nashik

2nd Year

3rd Semester

Graduation year and academic score: Not provided

TECHNICAL SKILLS

Programming: Python, C/C++ (learning / academic use)

Web: HTML, CSS, JavaScript

Tools & Libraries: GitHub, OpenCV (project exposure)

Areas of Interest: Artificial Intelligence, Machine Learning, Computer Vision, Web Development

ACADEMIC & PERSONAL PROJECTS

Face Attendance System

- Python-based computer-vision project exploring face recognition for attendance tracking. Camera-based workflow is being developed.

Hand-Gesture-Controlled Car Racing Game

- Python project concept using camera-based hand gestures to control a racing game, with collision recovery and gameplay interaction as planned features.

Web Development Project

- Built and worked on a website using HTML, CSS, and JavaScript; practiced page structure, styling, assets, and deployment workflow.

CORE STRENGTHS

Curiosity and continuous learning • Problem-solving mindset • Interest in building practical projects • Willingness to learn new tools and technologies
